Plants

in silico Plants

Submit: mc.manuscriptcentral.com/isplants

in silico Plants (*isP*) is an open-access, peer reviewed online journal dealing with all aspects of plant modelling. The journal aims to provide a single home for work from currently disparate research areas, publishing interdisciplinary, multidisciplinary and cross-disciplinary research at the interface between mathematics, computer science, plant biology and crop sciences. The journal is owned and managed by the Annals of Botany Company, a not-for-profit educational charity established to promote plant science worldwide.
